

Research Profile

Ph.D. candidate in Artificial Intelligence at Yonsei University working on multimodal intelligence, with a focus on reasoning, grounding, and agentic behavior. My research combines model design with diagnostic evaluation to improve how multimodal systems reason over visual evidence and make decisions across steps.

Research Areas

- Multimodal reasoning
- Grounded interaction and vision-language alignment
- Evaluation and diagnosis of AI systems
- Robustness and interpretability of multimodal models

Education

2023-26	Ph.D. , Artificial Intelligence, Yonsei University <i>Advisor: Seon Joo Kim; GPA: 4.3 / 4.3</i>
2019-23	M.S. , Computer Engineering, Seoul National University <i>Advisor: Gunhee Kim; GPA: 3.75 / 4.3</i>
2014-18	B.Sc. , Computer Science and Philosophy, Yonsei University <i>Double Major; GPA: 3.84 / 4.30</i>

Research Experience

May 2025 - Aug. 2025	Microsoft Research , AI Frontiers Conducted research on diagnosing multimodal reasoning capabilities in MLLMs (MathLens; arXiv 2025), with the collaboration later continuing into on process-level evaluation of web agents (WebStep; 2026).	Research Intern
Mar. 2024 - Jul. 2024	LG AI Research , AML Conducted research on extending multimodal LLMs beyond language-only outputs, including embodied VLA, image generation, and mathematical reasoning (DIST2Loss; ICLR 2026).	Research Intern
Jul. 2023 - Jan. 2024	Naver Cloud , Foundational Research Contributed to HyperCLOVA X LLM development and conducted preliminary exploration on omnimodal language modeling.	Research Intern

Selected Research

- 2026 **Where Did It Go Wrong? Process-Level Evaluation of Web Agents with Semantic State Tracking**
COLM 2026.
Developed a controlled benchmark for diagnosing process-level failures in web agents, enabling fine-grained analysis of exploration, execution, and decision-making behaviors.
- 2026 **v1: Learning to Point Visual Tokens for Multimodal Grounded Reasoning**
COLM 2026.
Developed visual pointing mechanisms to improve grounded reasoning in multimodal LLMs, enhancing their ability to align visual evidence with multi-step reasoning.
- 2026 **Teaching Metric Distance to Discrete Autoregressive Language Models**
ICLR 2026.
Introduced a training objective that teaches discrete autoregressive language models to represent metric distance, improving their ability to capture spatial and relational structure for embodied AI applications.
- 2025 **Are Any-to-Any Models More Consistent Across Modality Transfers Than Specialists?**
ACL 2025.
Developed a benchmark for evaluating consistency across multimodal transfer pathways, enabling fine-grained diagnosis of cross-modal behavior in any-to-any multimodal LLMs.
